Poems in Prose Ivan Sergeevich Turgenev 1883

Studies in Functional Stylistics Jan Chloupek 1993-01-01 The 15 contributions in the present collection can be divided roughly into three groups: (1) Papers directly following up functional stylistics and the theory of language culture,

elaborated in the classical period of the Prague Linguistic School. (2) Papers concerning the problems of style in a wider communicative arena. These contributions are closely related to contemporary text linguistics and also deal with problems involving psycholinguistics, sociolinguistics and semiotics. (3) Papers having, at least in some part, a pronounced historiographic character. These contributions reflect the fact that contemporary Czech linguistic research is firmly anchored in the Prague linguistic tradition. Although the authors' frame of reference is mainly Czech and the current language situation in the Czech Republic, the majority of contributions were intended to have a more general linguistic character and general linguistic validity.

Annual Plant Reviews, Plant Systems Biology
Gloria Coruzzi 2009-05-11 Plant Systems Biology

is an excellent new addition to the increasingly well-known and respected Annual Plant Reviews. Split into two parts, this title offers the reader: A fundamental conceptual framework for Systems Biology including Network Theory The progress achieved for diverse model organisms: Prokaryotes, C. elegans and Arabidopsis The diverse sources of “omic” information necessary for a systems understanding of plants Insights into the software tools developed for systems biology Interesting case studies regarding applications including nitrogen-use, flowering-time and root development Ecological and evolutionary considerations regarding living systems This volume captures the cutting edge of systems biology research and aims to be an introductory material for undergraduate and graduate students as well as plant and agricultural scientists, molecular biologists, geneticists and microbiologists. It also serves as a foundation in the biological aspects of the field for interested computer scientists. Libraries in all universities and research establishments where biological and agricultural sciences are studied and taught and integrated with Computer Sciences should have copies of this important volume on their shelves.

Walking the Lake District Fells - Keswick Mark Richards 2020-11-24 This guide describes ascents of 30 Lake District fells that can be climbed from Keswick, the Whinlatter Pass, Bassenthwaite, Hesketh Newmarket, Mungrisdale

and Threlkeld. The giants of the region Skiddaw and Blencathra need little introduction, their myriad routes attracting many a visitor and promising fantastic far-reaching views. The summits to the north, however, are less frequented, offering probably the closest experience to wilderness walking the Lakes has to offer, whereas to the west, the Whinlatter group present a sylvan alternative. Unlike other guidebooks which describe a single or limited number of routes to a particular destination, the aim of the Walking the Lake District Fells series is to offer all the options. These are presented as numbered sections which can be combined to create infinite possibilities - from simple ascents to longer ridge routes. You'll find the classics and popular routes alongside less traditional alternatives perfect for the wandering spirit. The series gives you both the freedom to devise your own routes and the information to make informed decisions, thanks to the clear descriptions of the routes, terrain, hazards, interesting features and safe descent paths should the weather close in. Also included are a handful of classic ridge routes for longer fell days. Mark Richards' inimitable text is complemented by HARVEY mapping and the author's own beautiful sketch topos and panoramas. Perfect for keen hillwalkers and peak-baggers alike and ideal both for pre-planning and use on the hill, Walking the Lake District Fells is the new incarnation of the

Fellranger series, which sees the volumes updated and trimmed to a more practical size. These true connoisseurs' guides are sure to inspire you to get out and explore the beautiful fells of Lakeland. For those collecting fell summits, a 'Fellrangers' hill list register can be found on the Long Distance Walkers Association website.

Global Practice in World History Patrick Manning
2009-01-30 This volume presents the thinking and the activities of some of the most serious and successful practitioners of world history. The 15 contributors are experienced historians from ten countries dispersed across five continents. Their essays confirm the existence of an emerging worldwide discourse on the past of our planet, but they also reveal the distinctive conditions and local innovations of global historians in different parts of the world. They give particular attention to the emergence of formal institutions for study of world history. University departments, research institutions, international conferences, and the leaders of museums are now demonstrably involved in full-scale study of the human past at a global level. Work in these institutions will surely reveal new patterns, dispel some old beliefs, provoke debates, and demonstrate the need for still more research. The book begins with the official report of the 2006 World History Research Agenda Symposium. This unusual conference, held in Boston, launched the formal discussion of

priorities in world history research. In seven further chapters, the authors describe university-level study of the world at undergraduate and especially graduate levels, conveying some remarkable advances in conceptualization of the global past and explaining the curricula they have implemented for directing students in world historical research. The final four chapters turn to the other institutions that support the development of advanced studies in world history: journals, museums, and research institutes. Here the authors document the organizational innovations that have brought discussion of world history issues to wider audiences. This is the second volume in the series on research in world history, produced by the World History Network, Inc. The previous volume, *World History: Global and Local Interactions* (Markus Wiener, 2005) displayed the accomplishments of Ph.D. students and graduates whose research focuses on topics in world history.

Everyday Post-Socialism Jeremy Morris
2016-09-01 This book offers a rich ethnographic account of blue-collar workers' everyday life in a central Russian industrial town coping with simultaneous decline and the arrival of transnational corporations. *Everyday Post-Socialism* demonstrates how people manage to remain satisfied, despite the crisis and relative poverty they faced after the fall of socialist projects and the social trends associated with

neoliberal transformation. Morris shows the 'other life' in today's Russia which is not present in mainstream academic discourse or even in the media in Russia itself. This book offers co-presence and a direct understanding of how the local community lives a life which is not only bearable, but also preferable and attractive when framed in the categories of 'habitability', commitment and engagement, and seen in the light of alternative ideas of worth and specific values. Topics covered include working-class identity, informal economy, gender relations and transnational corporations.

The New Global History Bruce Mazlish 2006-09-27 From a distinguished author in the field, *The New Global History* is a critical inquiry into the historical process of globalization, which is seen as a distinctly twentieth century phenomenon with its roots in the age of expansion of the early modern world. Cutting across disciplinary boundaries, *The New Global History* offers a fresh, overarching view of the process of globalization that is always empirically based and discusses the most important themes, such as policy, trade, cultural imperialism and warfare. Bruce Mazlish argues that globalization is not something that the West has imposed upon the

rest of the world, but the result of the interplay of many factors across continents. Students of history, politics and international studies, will all find this a valuable resource in the pursuit of their studies.

Matsushita Leadership John P. Kotter 2012-12-11 He was one of the most inspirational role models of all time. Thrown into poverty at age four, Konosuke Matsushita (Mat-SOSH-ta) struggled with the early deaths of family members, an apprenticeship which demanded sixteen-hour days at age nine, all the problems associated with starting a business with neither money nor connections, the death of his only son, the Great Depression, the horror of World War II in Japan, and more. Yet John P. Kotter shows in this fascinating and instructive book how, instead of being ground down by these hardships, Matsushita grew to be a fabulously successful entrepreneur and business leader, the founder of Japan's General Electric: the \$65 billion a year Matsushita Electric Corporation. His accomplishments as a leader, author, educator, philanthropist, and management innovator are astonishing, and outshine even Soichiro Honda, J.C. Penney, Sam Walton, and Henry Ford. In this immensely readable book, Kotter relates how Matsushita created a large business, invented management practices that are increasingly being used today, helped lead his country's economic miracle after World War II wrote dozens of books

in his latter years, founded a graduate school of leadership, created Japan's version of a Nobel Prize, and gave away hundreds of millions to good causes. The Matsushita story expands our notion of the possible, even for a sickly youngster who did not have the benefit of a privileged background, education, good looks, or a charismatic presence. It tells us much about leadership, entrepreneurship, a drive for lifelong learning, and their roots. It demonstrates the power of a longterm outlook, idealistic goals, and humility in the face of great success. Matsushita Leadership is both a biography and a set of lessons for careers and corporations in the 21st century. An inspirational story and a business primer, the implications are powerful, for organizations and for living a meaningful life.

Sociology and the New Materialism Kianoush

Bachmann 2017-06 New materialism has

emerged over the past 20 years as an approach

concerned fundamentally with the material

workings of power, but focused firmly upon social

production rather than social construction. Applied

to empirical research radically extends traditional

materialist analysis beyond traditional concerns

with structural and macro level social phenomena,

addressing issues of how desires, feelings and

meanings also contribute to social production.

New Materialism is currently having a profound

effect across disciplines. Rooted in post-Marxist

thinking, but spreading out on the flat ontology of

networks, objects and bodies, New Materialism is

an interdisciplinary discussion on the properties of

matter in terms of agency, ethical responsibility

and immanence. Along with post-humanism, the

Anthropocene, nonrepresentational theories and

post-Deleuzian thought, New Materialism asks us

to reconsider the nature of the human and the

non-human, the difference between actual and virtual, the emergence of politics and law in the face of ubiquitous materiality and, above all, the new responsibilities that come with it all.

Sociology and the New Materialism: Theory, Research, Action discusses issues of research design and methods in new materialist social inquiry, an approach that is attracting increasing interest across the social sciences as an alternative to either realist or constructionist ontologies. New materialism de-privileges human agency, focusing instead upon how assemblages of the animate and inanimate together produce the world, with fundamental implications for social inquiry methodology and methods. Conversely, new materialism takes matter as a lively and active participant in social life, problematises core hierarchical binaries such as human/nonhuman, living/non-living, and idealism/materialism, and expands the remit of what constitutes social life. Questioning these binaries renders humans as part of a flatter ontology than we might normally think. This book also considers how core social concerns of responsibility and sustainability might be transformed when we pay attention to the forces and capacities of materialities.

Shaping Taxpayers Lotta Björklund Larsen

2017-02-01 How do you make taxpayers comply? This ethnography offers a vivid, yet nuanced account of knowledge making at one of Sweden's most esteemed bureaucracies – the Swedish Tax Agency. In its aim to collect taxes and minimize tax faults, the Agency mediates the application of tax law to ensure compliance and maintain legitimacy in society. This volume follows one risk assessment project's passage through the Agency, from its inception, through the research phase, in discussions with management to its final abandonment. With its fiscal anthropological approach, *Shaping Taxpayers* reveals how

diverse knowledge claims – legal, economic, cultural – compete to shape taxpayer behaviour.

David Starkey's Music and Monarchy David Starkey 2013-07-04 For the kings and queens of England, a trumpet fanfare or crash of cymbals could be as vital a weapon as a cannon. Showcasing a monarch's power, prestige and taste, music has been the lifeblood of many a royal dynasty. From sacred choral works to soaring symphonies, *Music and Monarchy* looks at how England's character was shaped by its music. To David Starkey and Katie Greening, works like Handel's *Water Music* and Tallis's *Mass for Four Voices* were more than entertainment – they were pieces signalling political intent, wealth and ambition. Starkey and Greening examine England's most iconic musical works to demonstrate how political power has been a part of musical composition for centuries. Many of our current musical motifs of nationhood, whether it's the Last Night of the Proms or football terraces erupting in song, have their origins in the way the crown has shaped the national soundtrack. Published to coincide with a major BBC series, *Music and Monarchy* is not a book about music. It is a history of England written in music, from our leading royal historian. *Postmodern Social Theory* George Ritzer 1997 Ritzer's long-awaited text in *Postmodern Social Theory* is a readable & coherent introduction to the fundamental ideas & most important thinkers

in postmodern social theory.

Commuter Spouses Danielle Lindemann

2019-03-15 What can we learn from looking at married partners who live apart? In *Commuter Spouses*, Danielle Lindemann explores how couples cope when they live apart to meet the demands of their dual professional careers.

Based on the personal stories of almost one-hundred commuter spouses, Lindemann shows how these atypical relationships embody (and sometimes disrupt!) gendered constructions of marriage in the United States. These narratives of couples who physically separate to maintain their professional lives reveal the ways in which traditional dynamics within a marriage are highlighted even as they are turned on their heads. *Commuter Spouses* follows the journeys of these couples as they adapt to change and shed light on the durability of some cultural ideals, all while working to maintain intimacy in a non-normative relationship. Lindemann suggests that everything we know about marriage, and relationships in general, promotes the idea that couples are focusing more and more on their

individual and personal betterment and less on their marriage. Commuter spouses, she argues, might be expected to exemplify in an extreme manner that kind of self-prioritization. Yet, as this book details, commuter spouses actually maintain a strong commitment to their marriage. These partners illustrate the stickiness of traditional marriage ideals while simultaneously subverting expectations.

Across Cultural Borders Eckhardt Fuchs 2002

This innovative work offers the first comprehensive transcultural history of historiography. The contributors transcend a Eurocentric approach not only in terms of the individual historiographies they assess, but also in the methodologies they use for comparative analysis. Moving beyond the traditional national focus of historiography, the book offers a genuinely comparative consideration of the commonalities and differences in writing history. Distinguishing among distinct cultural identities, the contributors consider the ways and means of intellectual transfers and assess the strength of local historiographical traditions as they are challenged from outside. The essays explore the question of the utility and the limits of conceptions of modernism that apply Western theories of development to non-Western cultures. Warning against the dominant tendency in recent historiographies of non-Western societies to define these predominantly in relation to Western thought, the authors show the extent to which indigenous traditions have been overlooked. The key question is how the triad of industrialization, modernization, and the historicization process, which was decisive in the development of modern academic historiography, also is valid beyond Europe. Illustrating just how deeply suffused history writing is with European models, the book offers a broad theoretical platform for exploring

the value and necessity of a world historiography beyond Eurocentrism.

The Economic Weapon Nicholas Mulder

2022-01-11 The first international history of the emergence of economic sanctions during the interwar period and the legacy of this development Economic sanctions dominate the landscape of world politics today. First developed in the early twentieth century as a way of exploiting the flows of globalization to defend liberal internationalism, their appeal is that they function as an alternative to war. This view, however, ignores the dark paradox at their core: designed to prevent war, economic sanctions are modeled on devastating techniques of warfare. Tracing the use of economic sanctions from the blockades of World War I to the policing of colonial empires and the interwar confrontation with fascism, Nicholas Mulder uses extensive archival research in a political, economic, legal, and military history that reveals how a coercive wartime tool was adopted as an instrument of peacekeeping by the League of Nations. This timely study casts an overdue light on why sanctions are widely considered a form of war, and why their unintended consequences are so tremendous.

Coastal Environments and Global Change Gerd Masselink 2014-04-23 The coastal zone is one of the most dynamic environments on our planet and is much affected by global change, especially sea-level rise. Coastal environments harbour valuable ecosystems, but they are also hugely important from a societal point of view. This book, which draws on the expertise of 21 leading international coastal scientists, represents an up-to-date account of coastal environments and past, present and future impacts of global change. The first chapter of the book outlines key principles that underpin coastal systems and their behaviour. This is followed by a discussion of key processes, including sea level change, sedimentation, storms, waves and tides, that drive coastal change. The main part of the book consists of a discussion of the main coastal environments (beaches, dunes, barriers, salt marshes, tidal flats, estuaries, coral reefs, deltas, rocky and glaciated coasts and coastal groundwater), and how these are affected by

global change. The final chapter highlights strategies for coping with coastal change. Readership: final year undergraduate and postgraduate-level students on coastal courses in a wide range subjects, including geography, environmental management, geology, oceanography and coastal/civil engineering. The book will also be a valuable resource for researchers and applied scientists dealing with coastal environments. Additional resources for this book can be found at:
