Return from the Archipelago Leona Toker 2000 Comprehensive historical survey and critical analysis of the vast body of narrative literature about the Soviet gulag. Leona Toker organizes and characterizes both fictional narratives and survivors’ memoirs as she explores the changing hallmarks of the genre from the 1920s through the Gorbachev era. Toker reflects on the writings and testimonies that shed light on the veiled aspects of totalitarianism, dehumanization, and atrocity. Identifying key themes that recur in the narratives -- arrest, the stages of trial, imprisonment, labor camps, exile, escapes, special punishment, the role of chance, and deprivation -- Toker discusses the historical, political, and social contexts of these accounts and the ethical and aesthetic imperative they fulfill. Her readings provide extraordinary insight into prisoners’ experiences of the Soviet penal system. Special attention is devoted to the writings of Varlam Shalamov and Aleksandr Solzhenitsyn, but many works that are not well known in the West, especially those by women, are addressed. Consideration is also given to events that recently brought many memoirs to light years after they were written.

Colonizer or Colonized Sara E. Melzer 2011-11-29 Colonizer or Colonized introduces two colonial stories into the heart of France’s literary and cultural history. The first describes elite France’s conflicted relationship to the Ancient World. As much as French intellectuals aligned themselves with the Greco-Romans as an “us,” they also resented the Ancients as an imperial “them,” haunted by the memory that both the Greeks and Romans had colonized their ancestors, the Gauls. This memory put the elite on the defensive—defending against the legacy of this colonized past and the fear that they were the barbarian other. The second story mirrored the first. Just as the Romans had colonized the Gauls, France would colonize the New World, becoming the “New Rome” by creating a “New France.” Borrowing the Roman strategy, the French Church and State developed an assimilationist stance towards the Amerindian “barbarian.” This policy provided a foundation for what would become the nation’s most basic stance towards the other. However, this version of assimilation, unlike its subsequent ones, encouraged the colonized and the colonizer to engage in close forms of contact, such as mixed marriages and communities. This book weaves these two different stories together in a triangulated dynamic. It asks the Ancients to step aside to include the New World other into a larger narrative in which elite France carved out their nation’s emerging cultural identity in relation to both the New World and the Ancient World.

The Wind in the Willows Kenneth Grahame 2020-02-26 Mole, Water Rat, Badger, and the mischievous Toad live a quiet life on banks of the River Thames with the rest of their animal friends. But Toad tends to get into trouble, and his passion for cars eventually results in his being caught and kept a helpless prisoner in the remotest dungeon of the best-guarded castle in all the land. Dressed as a washerwoman and with some help from his friends—Toad manages to escape the castle and begins his journey home to Toad Hall. *The Wind in the Willows* is a book for those “who keep the spirit of youth alive in them; of life, sunshine, running water, woodlands, dusty roads, winter firesides.” So wrote Kenneth Grahame of his timeless tale of Rat, Mole, Badger, and Toad

The Gray House Mariam Petrosyan 2017-04-25 The Gray House is an astounding tale of how what others understand as liabilities can be leveraged into strengths. Bound to wheelchairs and dependent on prosthetic limbs, the physically disabled students living in the House are overlooked by the Outsides. Not that it matters to anyone living in the House, a hulking old structure that its residents know is alive. From the corridors and crawl spaces to the classrooms and dorms, the House is full of tribes, tinctures, scared teachers, and laws—all seen and understood through a prismatic array of teenagers’ eyes. But student deaths and mounting pressure from the Outsides put the time-defying order of the House in danger. As the tribe leaders struggle to maintain power, they defer to the awesome power of the House, attempting to make it through days and nights that pass in ways that clocks and watches cannot record.

Stalinism Robert C. Tucker 2017-07-05 In the years since Stalin’s death, his profound influence upon the historical development of Communism has remained elusive and in need of interpretation. Stalinism, as his system has become known, is a phenomenon which embraced all facets of political and social life. While its effect upon the Soviet Union and other nations today is far less than it was while Stalin lived, it is by no means dead. In this landmark volume some of the world’s foremost scholars of the subject, in a concerted group inquiry, present their interpretations of Stalinism and its influence on all areas of comparative Communist studies from history and politics to economics, sociology, and literary scholarship. The studies contained in this volume are an outgrowth of a conference on Stalinism held in Bellagio, Italy, sponsored by the American Council of Learned Societies. In his major contribution to this book, Leszek Kolakowski calls Stalinism “a unified state organism facing atom-like individuals.” This extraordinary volume, augmented by a revealing new introduction by the editor, Robert C. Tucker, can be seen as amplifying that remark nearly a half century after the death of Joseph Stalin himself. Contributors to this work are: Wlodzimierz Brus, Katerina Clark, Stephen F. Cohen, Alexander Erlich, Leszek Kolakowski, Moshe Lewin, Robert H. McNeal, Mihailo Markovic, Roy A. Medvedev, T. H. Rigby, Robert Sharlet, and H. Gordon Skilling. Robert C. Tucker’s principle work on Stalin has been described by George F. Kennan as “the most significant single contribution made to date, anywhere, to the history of Soviet power.”

1939 Richard James Overy 2009-08-27 24 August 1939: The fate of the world is hanging in the balance. Hitler has ambitions to invade Poland and hopes Stalin will now help him. And the West must try to stop him. If they don’t, world war will result. In this dramatic account of the last days of peace in 1939, Richard Overy re-creates hour by hour the unfolding story in the capitals of Europe as politicians and the public braced themselves for a war that they feared might spell the end of European civilisation. There was nothing entirely predictable or inevitable about the outcome. The West hoped that Hitler would see sense if they stood firm. Hitler was convinced the West would back down. There were moments of hesitation and moments of confrontation; secret intelligence was used by both sides to support their hopes. The one constant feature was the determination of Poland, a country created only in 1919, to fight a war that seemed entirely irrational, against the armed might of Germany. Countdown to War brings to life a defining moment in the history of the violent twentieth century.

Stalin’s Slave Ships Martin J. Bollinger 2003 Between 1932 and 1953, a fleet of ordinary cargo ships was pressed into extraordinary service. The fleet’s task was to relocate approximately one-million forced laborers to the Soviet gulag in Kolyma, located along the Arctic Circle in far northeastern Siberia. Bollinger presents the often-horrific stories of the gulag fleet and its passengers and reveals the unwitting role of the United States government in the operation.

Heritage Studies Marie Louise Stig Stri 2009-09-18 This is the first volume specifically dedicated to the consolidation and clarification of heritage studies as a distinct field with its own means of investigation. It presents the range of methods that can be used and illustrates their application through case studies from different parts of the world, including the UK and USA. The challenge that the collection makes explicit is that heritage studies must develop a stronger recognition of the scope and nature of its data and a concise yet explorative understanding of its analytical methods. The methods considered fall within three broad categories: textual/discourse analysis, methods for investigating people’s attitudes and behaviour; and methods for exploring the material qualities of heritage. The methods discussed and illustrated range from techniques such as text analysis, interviews, participant observation, to semiotic analysis of heritage sites and the use of GIS. Each paper discusses the ways in which methods used in social analysis generally are explored and adapted to the specific demands that arise when applied to the investigation of heritage in its many forms. Heritage studies is a seminal volume that will help to define the field. The global perspective and the shared focus upon the development of reflexive methodologies ensure that the volume explores these central issues in a manner that is simultaneously case-specific and of general relevance.

Convivial Urban Spaces Henry Shaftoe 2012-05-04 Despite developments in urban design during the last few decades, architects, urban planners and designers often continue to produce areas of bland, commercially led urban fabric that deliver the basic functional requirements of shelter, work and leisure but are socially unsustainable and likely generators of future problems. *Convivial Urban Spaces* demonstrates that successful urban public spaces are an essential part of a sustainable built environment. Without them we are likely to drift into an increasingly private and

polarized society, with all the problems that would imply. Taking a multidisciplinary approach, this book draws on research, and the literature and theory of environmental psychology and urban design, to advance our understanding of what makes effective public spaces. Practical guidance is illustrated with case studies from the UK, Spain, Germany and Italy. The result is a practical and clearly presented guide to urban public space for planners, architects and students of the urban environment.

Sustainable City/Developing World Chris Gossop 2010 Sustainable City/Developing World (ISOCARP Review 06) addresses the challenges posed by climate change for the cities and urban regions of the developing world. It is about the responses that are likely to be most relevant to the cities in the poorer countries, on the one hand, and to those of the fast industrialising countries on the other. How can planners, designers and other decision makers best secure development that is more resilient to the extreme conditions increasingly associated with climate change? And what techniques can they employ to ensure that the cities of tomorrow are developed along low carbon principles? These questions and others are addressed in eleven rich case studies drawn from around the world. Sustainable City/Developing World starts with three studies from Africa, including an important overview from UN Habitat. Next comes a second, global overview, provided by Jean-Pascal van Ypersele, Vice Chair of the Intergovernmental Panel on Climate Change; this provides five concise messages on the need for urgent action. Other papers in the book cover the planning of Chinese cities, and Abu Dhabi which is becoming an important world laboratory for low carbon planning and design. The final section of Review 06 introduces some new methods and strategies. These address the challenge of measuring a city’s carbon footprint (based upon Leicester in the English Midlands), post disaster planning in the wake of Hurricane Katrina, the use in Syria of satellite imagery to measure losses in urban green space, and the scope for an intensification of urban food growing as a new priority for planning. This beautifully illustrated book will be important reading for anyone seeking to learn more about international planning and design approaches in this era of climate change.

Distinguished from obvious Western equivalents such as cultural geography and the German Heimatkunde by both its dramatic history and unique social significance, kraevedenie has, for close to a hundred years, served as a key forum for expressing concepts of regional and national identity within Russian culture.”--Jacket.

The Routledge Atlas of the Second World War Martin Gilbert 2014-03-05 In *The Routledge Atlas of the Second World War*, Martin Gilbert graphically charts the war’s political, military, economic and social history through 247 maps. Each map has been specially drawn for this atlas, many of them covering topics that have not previously been mapped. The atlas covers all the major events from the German invasion of Poland in September 1939 to the defeat of Japan in August 1945, including the Blitz, the Fall of France, Pearl Harbor, the naval battles of the Atlantic, the Indian Ocean and the Pacific, Dieppe, Stalingrad, Midway, the Normandy Landings, the bombing of Warsaw, London, Coventry, Hamburg, Dresden, Tokyo, Hiroshima and Nagasaki, the Burma Railway, concentration camps and slave labour camps, and prisoner-of-war camps in Europe, the Americas and the Far East. Focusing on the human - and inhuman - aspects of the war, *The Routledge Atlas of the Second World War* includes examination of: military, naval and air campaigns on all the war fronts The war on land, at sea and in the air The economic and social aspects of the war The global nature of the war, in armed combat and in suffering The impact of the war on civilians, both under occupation, and as deportees and refugees The aftermath of the war: the post-war political and national boundaries; war graves, and the human cost of the war on every continent.

The Origins of the Second World War R. J. Overy 2014-01-14 The book explores the reasons why the Second World War broke out in September 1939 and not sooner, and why a European war expanded into world war by 1941. The war has usually been seen simply as Hitler’s war and yet the wider conflict that broke out when Germany invaded Poland was not the war that Hitler wanted. He had hoped for a short war against Poland; instead, Britain and France declared war on Germany. Richard Overy argues that any explanation of the outbreak of hostilities must therefore be multi-national and he shows how the war’s origins are to be found in the basic instability of the international system that was brought about by the decline of the old empires of Britain and France and the rise of ambitious new powers, Italy, Germany and Japan, keen to build new empires of their own.

Performing Violence Birgit Beumers 2009 New Russian Drama began its rise at the end of the twentieth century, following a decline in dramatic writing in Russia that stemmed back to the 1980s. Authors Beumers and Lipovetsky examine the representation of violence in these new dramatic works penned by young Russian playwrights. *Performing Violence* is the first English-language study of the consequent boom in drama and why this new breed of authors were writing fierce plays, the focus is on political and social representations of violence, its performances and justifications. *Performing Violence* seeks a vantage point for the analysis of brutality in post-Soviet culture.

Life and Terror in Stalin’s Russia, 1934-1941 Robert W. Thurston 1998-11-10 Examining Stalin’s reign of terror, this text argues that the Soviet people were not simply victims but also actors in the violence, criticisms and local decisions of the 1930s. It suggests that more believed in Stalin’s quest to eliminate internal enemies than were frightened by it.

Walking the Lake District Fells - Keswick Mark Richards 2020-11-24 This guide describes ascents of 30 Lake District fells that can be climbed from Keswick, the Whinlatter Pass, Bassenthwaite, Hesketh Newmarket, Mungrisdale and Threlkeld. The giants of the region Skiddaw and Blencathra need little introduction, their myriad routes attracting many a visitor and promising fantastic far-reaching views. The summits to the north, however, are less frequented, offering probably the closest experience to wilderness walking the lakes has to offer, whereas to the west, the Whinlatter group present a sylvan alternative. Unlike other guidebooks which describe a single or limited number of routes to a particular destination, the aim of the *Walking the Lake District Fells* series is to offer all the options. These are presented as numbered sections which can be combined to create infinite possibilities - from simple ascents to longer ridge routes. You’ll find the classics and popular routes alongside less traditional alternatives perfect for the wandering spirit. The series gives you both the freedom to devise your own routes and the information to make informed decisions, thanks to the clear descriptions of the routes, terrain, hazards, interesting features and safe descent paths should the weather close in. Also included are a handful of classic ridge routes for longer fell days. Mark Richards’ inimitable text is complemented by Harvey mapping and the author’s own beautiful sketch topos and panoramas. Perfect for keen hillwalkers and peak-baggers alike and ideal both for pre-planning and use on the hill, *Walking the Lake District Fells* is the new incarnation of the *Fellranger* series, which sees the volumes updated and trimmed to a more practical size. These true connoisseurs’ guides are sure to inspire you to get out and explore the beautiful fells of Lakeland. For those collecting fell summits, a *Fellrangers’ Hill List Register* can be found on the Long Distance Walkers Association website.

The Terror Dan Simmons 2008 Suspense fiction. The men on board Her Britannic Majesty’s Ships Terror and Erebus had every expectation of triumph. They were part of Sir John Franklin’s 1845 expedition - as scientifically advanced an enterprise as had ever set forth - and theirs were the first steam-driven vessels to go in search of the fabled North-West Passage. But the ships have now been trapped in the Arctic ice for nearly two years. Coal and provisions are running low. Yet the real threat isn’t the constantly shifting landscape of white or the flesh-numbing temperatures, dwindling supplies or the vessels being slowly crushed by the unyielding grip of the frozen ocean. No, the real threat is far more terrifying. There is something out there that haunts the frigid darkness, which stalks the ships, snatching one man at a time - mutilating, devouring. A nameless thing, at once nowhere and everywhere, this terror has become the expedition’s nemesis. When Franklin meets a terrible death, it falls to Captain Francis Crozier of HMS Terror to take

COMMAND AND LEAD THE REMAINING CREW ON A LAST, DESPERATE ATTEMPT TO FLEE SOUTH ACROSS THE ICE. WITH THEM TRAVELS AN ESKIMO WOMAN WHO CANNOT SPEAK. SHE MAY BE THE KEY TO SURVIVAL - OR THE HARBINGER OF THEIR DEATHS. AND AS SCURVY, STARVATION AND MADNESS TAKE THEIR TOLL, AS THE TERROR ON THE ICE BECOME EVERMORE BOLD, CROZIER AND HIS MEN BEGIN TO FEAR THERE IS NO ESCAPE.

MEGACITIES FRAUKE KRAAS 2013-07-12 AS URBANIZATION CONTINUES, AND EVEN ACCELERATES, SCIENTISTS ESTIMATE THAT BY 2015 THE WORLD WILL HAVE UP TO 60 'MEGACITIES' - URBAN AREAS WITH MORE THAN FIVE MILLION INHABITANTS. WITH THE IRRESISTIBLE ECONOMIC ATTRACTIONS OF URBAN CENTERS, PARTICULARLY IN DEVELOPING COUNTRIES, MAKING THE INFUX OF CITIZENS UNSTOPPABLE, MANY OF HUMANKIND'S COMING SOCIAL, ECONOMIC AND POLITICAL DRAMAS WILL BE PLAYED OUT IN MEGACITIES. THIS BOOK SHOWS HOW GEOGRAPHERS AND EARTH SCIENTISTS ARE CONTRIBUTING TO A BETTER UNDERSTANDING OF MEGACITIES. THE CONTRIBUTORS ANALYZE THE IMPACT OF SOCIO-ECONOMIC AND POLITICAL ACTIVITIES ON ENVIRONMENTAL CHANGE AND VICE VERSA, AND IDENTIFY SOLUTIONS TO THE WORST PROBLEMS. THEY PROPOSE WAYS OF IMPROVING THE MANAGEMENT OF MEGACITIES AND ACHIEVING A GREATER DEGREE OF SUSTAINABILITY IN THEIR DEVELOPMENT. THE GOALS, OF WISE USE OF HUMAN AND NATURAL RESOURCES, RISK REDUCTION (BOTH SOCIAL AND ENVIRONMENTAL) AND QUALITY OF LIFE ENHANCEMENT, ARE AGREED UPON. BUT, AS THIS TEXT PROVES, THE MEANS OF ACHIEVING THESE ENDS ARE VARIED. HENCE, CHAPTERS COVER AN ARRAY OF TOPICS, FROM HEALTH MANAGEMENT IN INDIAN MEGACITIES, TO PLANNING IN NEW YORK, TO TRANSPORT SOLUTIONS FOR THE CHRONICALLY TRAFFIC-CHOKED BANGKOK. AUTHORS COVER THE IMPACT OF CLIMATE CHANGE ON MEGACITIES, AS WELL AS LESS TANGIBLE ISSUES SUCH AS SOCIO-POLITICAL FRAGMENTATION IN THE URBAN AREAS OF RIO DE JANEIRO. THIS EXPLORATION OF SOME OF THE MOST CRUCIAL ISSUES THAT WE FACE AS A SPECIES SETS OUT RESEARCH THAT IS OF THE UTMOST IMPORTANCE, WITH THE POTENTIAL TO CONTRIBUTE SUBSTANTIALLY TO GLOBAL JUSTICE AND PEACE - AND THEREBY PROSPERITY.
