Visions of a New Land

Emma Widdis 2003-01-01 In 1917 the Bolsheviks proclaimed a world remade. This book shows how Soviet cinema encouraged popular support of state initiatives in the years up to the Second World War, helping to create a new Russian identity & territory, an 'imaginary geography' of Sovietness. *This Meager Nature* Christopher Ely 2009 Boundless Russia, humble yet full of hidden grandeur—such visions of "the motherland" became crucial markers of Russian national identity. This Meager Nature is the first full-length study to trace the cultural construction of Russia's landscape during the nineteenth century, showing how artistic and literary representations of nature reflected and shaped Russians' ideas about themselves and their nation. In the early 1800s, Russians commonly accepted the European judgment that their land lacked aesthetic value. That view changed with the outpouring of literary and artistic creativity that followed the century's political upheavals. Artists such as Aleksei Savrasov, Fedor Vasil'ev, Ivan Shishkin, and Nikolai Nekrasov turned to their native land and revealed the power of grey skies, vast open fields, and simple birch forests. Russians came to embrace their land's modest beauty, which represented strength and hidden depths. The historical creation of Russia's sense of place resulted not so much from its citizens' encounters with their environment, Ely argues, as from their long-term struggle to distinguish Russia from Europe. The humble beauty of the Russian land served to assert the genuineness of Russia against the inauthenticity of western Europe. For those who embraced it, the "meager" beauty of the landscape provided a powerful means for experiencing and expressing Russian national identity. He lives in West Palm Beach with his wife and two children. *In the Shadow of Yalta* Piotr Piotrowski 2009 A comprehensive study of art and politics in Eastern Europe between the end of World War II and the fall of Communism, this title brings together a wide range of issues, including artistic problems, movements, attitudes, and kinds of expression, and compares and describes them to create a new art map of the region.

Imperial Visions Mark Bassin 1999-06-24 In the middle of the nineteenth century, the Russian empire made a dramatic advance on the Pacific by annexing the vast regions of the Amur and Ussuri rivers. Although this remote realm was a virtual terra incognita for the Russian educated public, the acquisition of an 'Asian Mississippi' attracted great attention nonetheless, even stirring the dreams of Russia's most outstanding visionaries. Within a decade of its acquisition, however, the dreams were gone and the Amur region largely abandoned and forgotten. In an innovative examination of Russia's perceptions of the new territories in the Far East, Mark Bassin sets the Amur enigma squarely in the context of the Zeitgeist in Russia at the time. Imperial Visions demonstrates the fundamental importance of geographical imagination in the mentality of imperial Russia. This 1999 work offers a truly novel perspective on the complex and ambivalent ideological relationship between Russian nationalism, geographical identity and imperial expansion.

The Terror Dan Simmons 2008 Suspense fiction. The men on board Her Britannic Majesty's Ships Terror and Erebus had every expectation of triumph. They were part of Sir John Franklin's 1845 expedition - as scientifically advanced an enterprise as had ever set forth - and theirs were the first steam-driven vessels to go in search of the fabled North-West Passage. But the ships have now been trapped in the Arctic ice for nearly two years. Coal and provisions are running low. Yet the real threat isn't the constantly shifting landscape of white or the flesh-numbing temperatures, dwindling supplies or the vessels being slowly crushed by the unyielding grip of the frozen ocean. No, the real threat is far more terrifying. There is something out there that haunts the Arctic darkness, which stalks the ships, snatching one man at a time - mutilating, devouring. A nameless thing, at once nowhere and everywhere, this terror has become the expedition- 's nemesis. When Franklin meets a terrible death, it falls to Captain Francis Crozier of HMS Terror to take command and lead the remaining crew on a last, desperate attempt to flee south across the ice. With them travels an Eskimo woman who cannot speak. She may be the key to survival - or the harbinger of their deaths. And as scurvy, starvation and madness take their toll, as the Terror on the ice become evermore bold, Crozier and his men begin to fear there is no escape.

The Russian Empire and the World, 1700-1917 John P. LeDonne 1997 Both an historical survey of Russia's expansion during the Imperial Period (1700-1917) and a geopolitical interpretation of its motive and goals, this text also analyzes the policies to contain that expansion on a global scale. The Russian Empire and The World postulates the existence of a permanent geopolitical framework called the Heartland within which a Russian core area fought for hegemony. The text brings together various strands of Russian foreign policy before 1917, showing the consistency and importance of the policy's purpose and methods. It draws valuable lessons to help readers understand Soviet foreign policy and the renewed pressures Russia faces to restore its position within the Heartland, making this an ideal text for courses in Russian History, International Relations, and Political Science. Ranging from the beginning of the eighteenth century to the end of World War I, The Russian Empire and The World offers the most successful explanation as to how, despite reversals and limitations, Russia succeeded in becoming the world's largest contiguous land empire in European history. *Gravity's Rainbow* Thomas Pynchon 2013 Tyrone Slothrop, a GI in London in 1944, has a big problem. The Soviet Bloc, Unity and Conflict Zbigniew Brzezinski 1967 When this book was first published in 1960 The New York Times commented: "[Mr.] Brzezinski...is uniquely qualified to sift the scattered and often seemingly contradictory data on this subject...the volume is marked by unusual insight, richness of information, and stimulating thought." Mr. Brzezinski who is on leave from his post as Professor and Director of the Research Institute on Communist Affairs, Columbia University serving on State Department's Policy Planning Council, has revised and updated his important study wherever necessary and added three new chapters on recent developments. He gives particular attention to the Sino-Soviet dispute.

How St. Petersburg Learned to Study Itself Emily D. Johnson 2006 "Johnson traces the history of kraevedenie, showing how St. Petersburg-based scholars and institutions have played a central role in the evolution of the discipline. Distinguished from obvious Western equivalents such as cultural geography and the German Heimatkunde by both its dramatic history and unique social significance, kraevedenie has, for close to a hundred years, served as a key forum for expressing concepts of regional and national identity within Russian culture."--Jacket.

Mapping an Empire Matthew H. Edney 2009-02-15 In this fascinating history of the British surveys of India, Matthew H. Edney relates how imperial Britain used modern survey techniques to not only create and define the spatial image of its Empire, but also to legitimate its colonialist activities. "There is much to be praised in this book. It is an excellent history of how India came to be painted red in the nineteenth century. But more importantly, Mapping an Empire sets a new standard for books that examine a fundamental problem in the history of European imperialism."--D. Graham Burnett, Times Literary Supplement "Mapping an Empire is undoubtedly a major contribution to the rapidly growing literature on science and empire, and a work which deserves to stimulate a great deal of fresh thinking and informed research."--David Arnold, Journal of Imperial and Commonwealth History "This case study offers broadly applicable insights into the relationship between ideology, technology and politics. . . . Carefully read, this is a tale of irony about wishful thinking and the limits of knowledge."--Publishers Weekly

Designing UNESCO Christopher E. M. Pearson 2017-07-05 Designing UNESCO: Art, Architecture and International Politics at Mid-Century represents the first full-length monograph on the genesis, construction and reception of the Paris headquarters of the United Nations' Educational, Scientific and Cultural Organization (UNESCO). The book traces the long and complex birth of UNESCO's permanent seat from its conception in 1950 to its inauguration in 1958, showing how its history constitutes a unique nexus of modernist practices in twentieth-century international politics, art, architecture and criticism. Drawing on a wide range of unpublished archival material and examining critical reception of the building in the local and international press, Christopher Pearson's analysis operates on formal, structural and theoretical levels, revealing many of the largely unspoken assumptions of modern architecture at mid-century and elucidating the conflicted relation between art and science in the post-war period. The volume also throws new light on many of the major architects and artists of the period, among them Breuer, Gropius, Le Corbusier and Eero Saarinen, as well as Picasso, Moore, Miró, Calder and Noguchi. Designing UNESCO is a compelling and original account of one of the most important, yet under-appreciated, buildings of twentieth-century modernism.

The Gray House Mariam Petrosyan 2017-04-25 The Gray House is an astounding tale of how what others understand as liabilities can be leveraged into strengths. Bound to wheelchairs and dependent on prosthetic limbs, the physically disabled students living in the House are overlooked by the Outsides. Not that it matters to anyone living in the House, a hulking old structure that its residents know is alive. From the corridors and crawl spaces to the classrooms and dorms, the House is full of tribes, tinctures, scared teachers, and laws—all seen and understood through a prismatic array of teenagers’ eyes. But student deaths and mounting pressure from the Outsides put the time-defying order of the House in danger. As the tribe leaders struggle to maintain power, they defer to the awesome power of the House, attempting to make it through days and nights that pass in ways that clocks and watches cannot record.

Power and Architecture Michael Minkenberg 2014-06-30 Capital cities have been the seat of political power and central stage for their state's political conflicts and rituals throughout the ages. In the modern era, they provide symbols for and confer meaning to the state, thereby contributing to the "invention" of the nation. Capitals capture the imagination of natives, visitors and outsiders alike, yet also express the outcomes of power struggles within the political systems in which they operate. This volume addresses the reciprocal relationships between identity, regime formation, urban planning, and public architecture in the Western world. It examines the role of urban design and architecture in expressing (or hiding) ideological beliefs and political agenda. Case studies include "old" capitals such as Rome, Vienna, Berlin and Warsaw; "new" ones such as Washington DC, Ottawa, Canberra, Ankara, Bonn, and Brasilia; and the "European" capital Brussels. Each case reflects the authors' different disciplinary backgrounds in architecture, history, political science, and urban studies, demonstrating the value of an interdisciplinary approach to studying cities.

Refining Russia Catriona Kelly 2001-08-09 Advice literature (etiquette manuals, guides to hygiene and house management and treatises on upbringing) enjoyed massive popularity in Russia between the late eighteenth and the late twentieth centuries. It reflected changing attitudes to appropriate behaviour in private and public, to the acquisition of possessions, and not least to national identity (for many Russians, reading how-to books was seen as a way of 'learning how to be a Westerner'). Written or translated by members of the cultural elite trying to encourage what they saw as civilized behaviour, advice literature was also a conduit for changing views of mass readers and of their place in society. This important and engaging book is the first systematic exploration of this hitherto neglected genre of popular printed text. It examines the evolution of advice literature from the Enlightenment to the post-Soviet era, from translations of Fénelon and Madame de Lambert in the 1760s and of Samuel Smiles in the late nineteenth and early twentieth centuries, to tracts by Gogol and Tolstoi, Soviet pamphlets on 'how to be cultured', and post-Soviet guides to 'window treatments'. It draws on a huge range of sources - memoirs, 'novelised conduct books' such as Anna Karenina, parody advice literature, letters, and reviews - to examine the broader significance of how-to books, and their relationship with daily life (by) as construct and as lived reality. The result is a book that not only makes a major contribution to the study of popular culture, but also throws an unexpected and revealing light on Russian history more broadly.

Interpreting totalitarian art and literature in the context of cultural history, this brilliant essay likens totalitarian aims to the modernists' goal of producing world-transformative art. In this new edition, Groys revisits the debate that the book has stimulated since its first publication.

The Landscape of Stalinism Evgeny Dobrenko 2011-11-15 This wide-ranging cultural history explores the expression of Bolshevik Party ideology through the lens of landscape, or, more broadly, space. Portrayed in visual images and words, the landscape played a vital role in expressing and promoting ideology in the former Soviet Union during the Stalin years, especially in the 1930s. At the time, the iconoclast of the immediate postrevolutionary years had given way to nation building and a conscious attempt to create a new Soviet culture. In painting, architecture, literature, cinema, and song, images of landscape were enlisted to help mold the masses into joyful, hardworking citizens of a state with a radiant, utopian future -- all under the fatherly guidance of Joseph Stalin. From backgrounds in history, art history, literary studies, and philosophy, the contributors show how Soviet space was sanctified, coded, and sold as an ideological product. They explore the ways in which producers of various art forms used space to express what Katerina Clark calls the cartography of power -- an organization of the entire country into a hierarchy of spheres of relative sacredness, with Moscow at the center. The theme of center versus periphery figures prominently in many of the essays, and the periphery is shown often to be paradoxically central. Examining representations of space in objects as diverse as postage stamps, a hikers' magazine, advertisements, and the Soviet musical, the authors show how cultural producers attempted to naturalize ideological space, to make it an unquestioned part of the worldview. Whether focusing on the new or the centuries-old, whether exploring a built cityscape, a film documentary, or the painting Stalin and Voroshilov in the Kremlin, the authors offer a consistently fascinating journey through the landscape of the Soviet ideological imagination. Not all features of Soviet space were entirely novel, and several of the essayists assert continuities with the prerevolutionary past. One example is the importance of the mother image in mass songs of the Stalin period; another is the "boundless longing" inspired in the Russian character by the burden of living amid vast empty spaces. But whether focusing on the new or the centuries-old, whether exploring a built cityscape, a film documentary, or the painting Stalin and Voroshilov in the Kremlin, the authors offer a consistently fascinating journey through the landscape of the Soviet ideological imagination.

Muralnomad Romy Golan 2009 In this fascinating and generously illustrated book, Romy Golan explores mural and mural-like works in Europe from the 1920s to the 1950s, beginning with Monet's installation of the Nymphéas at the Musée de l'Orangerie in Paris, and ending dramatically with Le Corbusier's huge tapestries in Chandigarh, India. Many artists and critics looked to the mural as a corrective to the ills of painterly Modernism: the disruption of the pictorial field at the hands of Cubism and other avant-garde practices; the commodification of painting through the market for easel paintings; and more generally the alienation of man and the anomie of art in the modern condition. At the same time it was clear that a return to the mural format would never be more than an anachronistic and futile gesture. This book is therefore about mural paintings that are not convinced they belong on walls: such strange objects as mosaics designed to be disassembled; paintings that resemble large-scale photographs, or photomurals; and tapestries that functioned as portable woolen walls. The author argues that the uncertain relation of these objects to the wall is symptomatic of the dilemmas that troubled European art, artists, and architects during the middle decades of the twentieth century.

Architecture in Uniform Jean-Louis Cohen 2011 This fascinating book offers a new perspective on the architectural history of the Second World War, which in previous accounts has most often been viewed as a hiatus between peaceful periods of production. Jean-Louis Cohen contends instead that during the years between the bombings of Guernica in 1937 and of Hiroshima in 1945, specific advances were fundamental to the process of modernization and led to the definitive supremacy of modernism in architecture. Centering the discussion on ten main themes, the author investigates various aspects of architecture's mobilization in the war years, as well as the trajectories of individual architects. He analyzes architectural developments worldwide and takes into account each of the major participants in the war, including the United States, Japan, Great Britain, France, Italy, the Netherlands, Germany, and the Soviet Union. The book not only focuses on plans, buildings, and technological inventions but also examines the many types of visual representation used for war purposes, enhanced by a rich array of more than 300 illustrations.
