Statistical Theory and Modeling for
Turbulent Flows P. A. Durbin

2001-03-12 Most natural and industrial flows are turbulent. The atmosphere and oceans, automobile and

aircraft engines, all provide examples of this ubiquitous phenomenon. In recent years, turbulence has become a very lively area of scientific research and application, and this work offers a grounding in the subject of turbulence, developing both the physical insight and the mathematical framework needed to express the theory. Providing a solid foundation in the key topics in turbulence, this valuable reference resource enables the reader to become a knowledgeable developer of predictive tools. This central and broad ranging topic would be of interest to graduate students in a broad range of subjects, including aeronautical and mechanical engineering, applied mathematics and the physical sciences. The accompanying solutions manual to the

text also makes this a valuable teaching tool for lecturers and for practising engineers and scientists in computational and experimental and experimental fluid dynamics.

Mediating Languages and Cultures

Dieter Buttjes 1991 The history of

"language teaching" is shot through with methods and approaches to language learning - most recently with "communicative language teaching" - but this book demonstrates that a more differentiated and richer understanding of learning a foreign language is both necessary and desirable. Languages and cultures are interlinked and interdependent and their teaching and learning should be too. Learning another language is part of a complex process of learning and understanding other people's ways of life, ways of thinking and socio-economic experience

Geographies of Modernism Peter

Brooker 2007-05-07 One of the most pivotal developments in contemporary literary and cultural studies is the investigation of space and geography, a trend which is proving particularly important for modernist studies. This volume explores the interface between modernism and geography in a range of writers, texts and artists across the twentieth century. Cross-disciplinary essays test and extend a variety of methodological approaches and reveal the reach of this topic into every corner of modernist scholarship. From Imagist poetry and the Orient to teashops and modernism in London, or

from mapping and belonging in James Joyce or Joseph Conrad to the space of new media artists, this remarkable volume offers fresh, invigorating research that ranges across the field of modernism. It also serves to identify the many exciting new directions that future studies may take. With groundbreaking essays from an international team of highly-regarded scholars, *Geographies of Modernism* is an important step forward in literary and cultural studies.

In Excess Masha Salazkina 2009-08-01
During the 1920s and '30s, Mexico attracted an international roster of artists and intellectuals—including Orson Welles, Katherine Anne Porter, and Leon Trotsky—who were drawn to the heady tumult engendered by battling cultural ideologies in an

emerging center for the avant-garde. Against the backdrop of this cosmopolitan milieu, *In Excess* reconstructs the years that the renowned Soviet director Sergei Eisenstein spent in the country to work on his controversial film *¡Que Viva Mexico!* Illuminating the inextricability of Eisenstein's oeuvre from the global cultures of modernity and film, Masha Salazkina situates this unfinished project within the twin contexts of postrevolutionary Mexico and the ideas of such contemporaneous thinkers as Walter Benjamin. In doing so, Salazkina explains how Eisenstein's engagement with Mexican mythology, politics, and art deeply influenced his ideas, particularly about sexuality. She also uncovers the role Eisenstein's bisexuality

played in his creative thinking and identifies his use of the baroque as an important turn toward excess and hybrid forms. Beautifully illustrated with rare photographs, *In Excess* provides the most complete genealogy available of major shifts in this modern master's theories and aesthetics.

The European City Leonardo Benevolo 1995-11-15 This is a history of the European city from the early Middle Ages to the present. Tracing the city from the survival of urban life after the collapse of the Roman Empire to the effects of modern industrialization and transportation, Professor Benevolo's book also provides a fascinating account of the relationship between urban life and cultural and intellectual life.

The Black Swan Nassim Nicholas Taleb 2007-04-17 *The Black Swan* is a standalone book in Nassim Nicholas Taleb's landmark *Incerto* series, an investigation of opacity, luck, uncertainty, probability, human error, risk, and decision-making in a world we don't understand. The other books in the series are *Fooled by Randomness*, *Antifragile*, and *The Bed of Procrustes*. A black swan is a highly improbable event with three principal characteristics: It is unpredictable; it carries a massive impact; and, after the fact, we concoct an explanation that makes it appear less random, and more predictable, than it was. The astonishing success of Google was a

black swan; so was 9/11. For Nassim Nicholas Taleb, black swans underlie almost everything about our world, from the rise of religions to events in our own personal lives. Why do we not acknowledge the phenomenon of black swans until after they occur? Part of the answer, according to Taleb, is that humans are hardwired to learn specifics when they should be focused on generalities. We concentrate on things we already know and time and time again fail to take into consideration what we don't know. We are, therefore, unable to truly estimate opportunities, too vulnerable to the impulse to simplify, narrate, and categorize, and not open enough to rewarding those who can imagine the "impossible." For years, Taleb has studied how we fool ourselves into

thinking we know more than we actually do. We restrict our thinking to the irrelevant and inconsequential, while large events continue to surprise us and shape our world. In this revelatory book, Taleb explains everything we know about what we don't know, and this second edition features a new philosophical and empirical essay, "On Robustness and Fragility," which offers tools to navigate and exploit a Black Swan world. Elegant, startling, and universal in its applications, The Black Swan will change the way you look at the world. Taleb is a vastly entertaining writer, with wit, irreverence, and unusual stories to tell. He has a polymathic command of subjects ranging from cognitive science to business to probability theory. The Black Swan is a landmark

book—itself a black swan. Praise for Nassim Nicholas Taleb “The most prophetic voice of all.”—GQ Praise for The Black Swan “[A book] that altered modern thinking.”—The Times (London) “A masterpiece.”—Chris Anderson, editor in chief of Wired, author of The Long Tail “Idiosyncratically brilliant.”—Niall Ferguson, Los Angeles Times “The Black Swan changed my view of how the world works.”—Daniel Kahneman, Nobel laureate “[Taleb writes] in a style that owes as much to Stephen Colbert as it does to Michel de Montaigne. . . . We eagerly romp with him through the follies of confirmation bias [and] narrative fallacy.”—The Wall Street Journal “Hugely enjoyable—compelling . . . easy to dip into.”—Financial Times “Engaging . . . The Black Swan has appealing

cheek and admirable ambition.”—The New York Times Book Review From the Hardcover edition.

Immoral Memories Sergei Eisenstein
2013-11-01 Republished for the first

time since the 1980s, a legendary book on the cinema from one of the most important figures in the history of film. Vivid, eccentric, and free-ranging, this memoir is written in a style reminiscent of the brilliant visual effects of montage and dynamic progression of the legendary Russian director. Eisenstein wittily portrays his life in Russia from the time of the Revolution, his travels in the West, and his encounters with an amazing medley of people on both sides of the Iron Curtain, including Charlie Chaplin, Marlene Dietrich, and Man Ray. With 48 pages of illustrations from the author's own collection, including photos and personal sketches, this is the fullest picture possible of a man and his films, from one of the most iconic eras of the art form.

Island Rivers John R. Wagner
2018-06-18 Anthropologists have
written a great deal about the
coastal adaptations and seafaring
traditions of Pacific Islanders, but
have had much less to say about the
significance of rivers for Pacific
island culture, livelihood and

identity. The authors of this
collection seek to fill that gap in
the ethnographic record by drawing
attention to the deep historical
attachments of island communities to
rivers, and the ways in which those
attachments are changing in response
to various forms of economic
development and social change. In
addition to making a unique
contribution to Pacific island
ethnography, the authors of this
volume speak to a global set of
issues of immense importance to a
world in which water scarcity,
conflict, pollution and the
degradation of riparian environments
afflict growing numbers of people.
Several authors take a political
ecology approach to their topic, but
the emphasis here is less on hydro-
politics than on the cultural meaning

of rivers to the communities we describe. How has the cultural significance of rivers shifted as a result of colonisation, development and nation-building? How do people whose identities are fundamentally rooted in their relationship to a particular river renegotiate that relationship when the river is dammed to generate hydro-power or polluted by mining activities? How do blockages in the flow of rivers and underground springs interrupt the intergenerational transmission of local ecological knowledge and hence the ability of local communities to construct collective identities rooted in a sense of place?

Bauhaus Futures Laura Forlano 2019-10-22 Essays, photo-essays, interviews, manifestos, diagrams, and a play explore the varied legacies, influences, and futures of the Bauhaus. What would keep the Bauhaus up at night if it were practicing today? A century after its founding by Walter Gropius in Weimar, Germany, as an “experimental laboratory of the future,” who are the pioneering experimentalists who reinscribe or resist Bauhaus traditions? This book explores the varied legacies,

influences, and futures of the Bauhaus. Many of the animating issues of the Bauhaus—its integration of research, teaching, and practice; its experimentation with materials; its democratization of design; its open-minded, heterogeneous approach to ideas, theories, methods, and styles—remain relevant. The contributors to Bauhaus Futures address these but go further, considering issues that design has largely ignored for the last hundred years: gender, race, ethnicity, class, sexuality, and disability. Their contributions take the form of essays, photo-essays, interviews, manifestos, diagrams, and even a play. They discuss, among other things, the Bauhaus curriculum and its contemporary offshoots; Bauhaus legacies at the MIT Media Lab, Black

Mountain College, and elsewhere; the conflict between the Bauhaus ideal of humanist universalism and current approaches to design concerned with race and justice; designed objects, from the iconic to the precarious; textile and weaving work by women in the Bauhaus and the present day; and design and technology. Liberal Forces in Twentieth Century
Yugoslavia: Memoirs of Ladislav Bevc
spans 80 years of his professional
and political life: from the early
years of his childhood in the large
family of a civil servant, to his
studies in Vienna and the
interruption of his professional
career by military service at the
Eastern and Western front under the
detested Austrian flag, to a
flourishing career in the liberated
homeland of Yugoslavia. Born in
Skocijan, Slovenia, he graduated as a

civil engineer from the Technical
University in Vienna. In World War I,
he served on the front in Russia and
France. Following the war, Ladislav
Bevc focused his life on politics,
civic organizations, and the
engineering profession. In Ljubljana,
he served as a city councilman and
was active in civic and academic
affairs. He helped establish a new
University and resisted Communist
subversion in the Sokol Patriotic
Gymnast Association. Following the
German invasion in World War II, he
joined the resistance movement of
General Dragoljub Mihajlovich, which
led to encounters with the Gestapo
and eventual political emigration. In
1949, he immigrated to California,
where he remained active in the
efforts to liberate Yugoslavia from
the Communists and rescued his

family, who had been held hostage. In the free world, he organized the Slovenian liberal émigrés in the Slovenian Democratic Party and was instrumental in rebuilding the Yugoslav Sokol in the Free World. He practiced civil engineering in the United States, where he was elected Fellow of the American Society of Civil Engineers. He died on November 29, 1988.

Introduction to Blockchain Technology

Tiana Laurence Blockchain technology has come a long way since the initial vision published by Satoshi Nakamoto in 2008. Big buzz words like "bitcoin," "blockchain," and "cryptocurrency" are everywhere. Companies and governments have started to use blockchain technology in earnest and will increasingly do so for the foreseeable future. This book takes an in-depth look at blockchain technology and how users can take advantage of its potential. Since its initial conception, blockchain has encompassed both a

social promise and new technology. Originally proposed as a solution for Bitcoin's cryptocurrency record-keeping system, blockchains are now used to store the records of all types of applications. Core services we all depend on like the transfer of money, voting, land records, IP rights, and identity all rely on intermediaries. Blockchain software has begun taking the place of these antiquated systems. The software becomes the trusted record-keeping system, and the rules programed into the software become the intermediaries. This book explains the fundamentals of blockchain technology and assumes that the reader has little to no knowledge of the subject. Topics are explained as simply as possible, while not obscuring details that may affect the

reader. It also gives the reader insight into the critical differences in blockchain software and will provide them with a basic understanding of how and why these systems work. After reading this book, the reader will be able to speak with confidence on the topic, know key differences in technology. The reader will also have critical insight into blockchain software's inherent limitations and shortcomings. This book is also the definitive guide to the Blockchain Technology Foundation (BTF) exam from EXIN. It will prepare the reader for the test, and each chapter ends with review questions for extra guidance in preparing for the exam.

Democrazia Futurista F. T. F. T. Marinetti 2015-08-12 Il nostro Partito Politico Futurista è nato naturalmente dalla grande corrente spirituale del movimento artistico futurista. Unico nella storia il nostro Partito è stato concepito, voluto e attuato da un gruppo di artisti poeti, pittori, musicisti, ecc.: che, carichi di genio e di coraggio ormai provati, dopo avere svecchiato brutalmente e modernizzato l'arte italiana sono giunti logicamente ad una concezione di politica assolutamente sgombra di retorica, violentemente italiana e violentemente rivoluzionaria, libera,

dinamica e armata di metodi assolutamente pratici. Poichè un passato illustre schiacciava l'Italia e un avvenire infinitamente glorioso ribolliva nel suo seno, appunto in Italia, sotto il nostro cielo troppo voluttuoso, l'energia futurista doveva nascere, dieci anni fa, organizzarsi, canalizzarsi, trovare in noi i suoi motori, i suoi apparecchi di illuminazione e di propagazione. L'Italia, più di qualunque altro paese, aveva un bisogno urgente di futurismo, poichè moriva di passatismo. L'ammalato inventò il proprio rimedio. Noi siamo i suoi medici occasionali. Il rimedio vale per gli ammalati di ogni paese.

This Thing of Darkness Joan Neuberger 2019-03-15 Sergei Eisenstein's unfinished masterpiece, *Ivan the Terrible*, was no ordinary movie. Commissioned by Joseph Stalin in 1941 to justify state terror in the sixteenth century and in the twentieth, the film's politics, style, and epic scope aroused controversy even before it was released. In *This Thing of Darkness*, Joan Neuberger offers a sweeping account of the conception, making, and reception of *Ivan the Terrible* that weaves together Eisenstein's expansive thinking and experimental

practice with a groundbreaking new view of artistic production under Stalin. Drawing on Eisenstein's unpublished production notebooks, diaries, and manuscripts, Neuberger's riveting narrative chronicles Eisenstein's personal, creative, and political challenges and reveals the ways cinematic invention, artistic theory, political critique, and historical and psychological analysis went hand in hand in this famously complex film. Neuberger's bold arguments and daring insights into every aspect of Eisenstein's work during this period, together with her ability to lucidly connect his wide-ranging late theory with his work on *Ivan*, show the director exploiting the institutions of Soviet artistic production not only to expose the cruelties of Stalin and his circle

but to challenge the fundamental principles of Soviet ideology itself. Ivan the Terrible, she argues, shows us one of the world's greatest filmmakers and one of the 20th century's greatest artists observing the world around him and experimenting with every element of film art to explore the psychology of political ambition, uncover the history of recurring cycles of violence and lay bare the tragedy of absolute power.

Film Form Sergei Eisenstein

2014-06-17 A classic on the aesthetics of filmmaking from the pioneering Soviet director who made Battleship Potemkin. Though he completed only a half-dozen films, Sergei Eisenstein remains one of the great names in filmmaking, and is

also renowned for his theory and analysis of the medium. Film Form collects twelve essays, written between 1928 and 1945, that demonstrate key points in the development of Eisenstein's film theory and in particular his analysis of the sound-film medium. Edited, translated, and with an introduction by Jay Leyda, this volume allows modern-day film students and fans to gain insights from the man who produced classics such as Alexander Nevsky and Ivan the Terrible and created the renowned "Odessa Steps" sequence.

The Film Sense Sergei Eisenstein 1947 A renowned Soviet director discusses his theory of film as an artistic medium which must appeal to all senses and applies it to an analysis of sequences from his major movies
