Recent years have seen the evidence that microbial communities are neither immune to disruption nor do they have the capacity to recover completely after a stressful climate event. This volume documents the important role of microorganisms as climate engineers and considers mitigation and adaptation strategies as well. It goes on to present the research that addresses a diverse array of topics on the impact of climate change on plant-microbe interactions and microbial aquatic life, change-induced aggravations in microbial populations and processes. The book also addresses microbial foodborne diseases resulting from challenging climates. Other topics include algae as indicators of climate change and strategies for facilitating sustainable agro-ecosystems. This book will be immensely helpful in the study of plant microbiology, agricultural sciences, biotechnology, climate science, and environmental microbiology. It will also be applicable to the field of microbial biotechnology, agricultural, and other life and environmental sciences"--

*The Philosophy of Human Nature in Christian Perspective* Peter J. Weigel 2015-01 In this work, leading contemporary philosophers discuss key facets of the human person from a variety of perspectives in Christian thought. This closely woven volume includes chapters by Nicholas Wolterstorff on the distinction between humans and other animals; Robert Sokolowski on language; Marilyn McCord Adams on the presence of the Holy Spirit in human beings; Roland Teske on the soul and soteriology; Nicolas Austriaco on bioethics and human nature; J. Hayes Hurley on consciousness; and Germain Grisez on death and immortality. An excellent source for scholars, this book is also ideal for courses in philosophy, theology, and psychology.

*Rediscovering Rikyu and the Beginnings of the Japanese Tea Ceremony* Herbert E. Plutschow 2003 A comprehensive study of the celebrated Japanese tea master Rikyu (1522-91). Rikyu's tea is considered as an important political as well as a socio-religious ritual in response to the dramatic changes taking place in the country at large: the hundred-year civil war--Sengoku or Warring States period--was finally coming to an end and the process of political unification under the strong military leadership of Oda Nobunaga (1534-82) and Toyotomi Hideyoshi (1537-98) had begun. A key focus on the book is the author's research into why Rikyu's tragic suicide was a necessary outcome of the emerging conflict between ritual, art, and politics. The study also provides insights into a sixteenth-century Japanese sense of beauty commonly called wabi, as well as insight into what links Rikyu's wabi tea with Zen Buddhism and ultimately to ritual and the state.
