*Russia's Homegrown Insurgency* 2012 The three papers offered in this monograph provide a detailed analysis of the insurgency and counterinsurgency campaigns being conducted by Islamist rebels against Russia in the North Caucasus. This conflict is Russia's primary security threat, but it has barely

registered on Western minds and is hardly reported in the West as well. To overcome this neglect, these three papers go into great detail concerning the nature of the Islamist challenge, the Russian response, and the implications of this conflict. This monograph, in keeping with SSI's objectives, provides a basis for dialogue among U.S., European, and Russian experts concerning insurgency and counterinsurgency, which will certainly prove useful to all of these nations, since they will continue to be challenged by such wars well into the future. It is important for us to learn from the insurgency in the North Caucasus, because the issues raised by this conflict will not easily go away, even for the United States as it leaves Afghanistan.

*Bosnian, Croatian, Serbian, a Textbook* Ronelle Alexander 2010-03-01 "Three official languages have emerged: Croatian in Croatia, Serbian in Serbia, and both these languages plus Bosnian in

Bosnia-Herzegovina. Bosnian, Croatian, Serbian, a Textbook introduces the student to all three. Dialogues and exercises appear in each language, presented side by side for easy comparison; in addition, Serbian is rendered in both its Latin and its Cyrillic spellings. Teachers may choose a single language to use in the classroom, or they may want to familiarize students with all three"--Book jacket.

**European-Russian Space Cooperation** Brian Harvey

2021-05-12 The story of European-Russian collaboration in space is little known and its importance all too often understated. Because France was the principal interlocutor between these nations, such cooperation did not receive the

attention it deserved in English-language literature. This book rectifies that history, showing how Russia and Europe forged a successful partnership that has continued to the present day. Space writer Brian Harvey provides an in-depth picture of how this European-Russian relationship evolved and what factors—scientific, political and industrial—propelled it over the decades. The history begins in the cold war period with the first collaborative ventures between the Soviet Union and European countries, primarily France, followed later by Germany and other European countries. Next, the chapters turn to the missions when European astronauts flew to Russian space stations, the Soyuz rocket made a new home in European territory in the South American jungle and science missions were flown to study deep space. Their climax is the joint mission to explore Mars, called ExoMars, which has already sent a mission to Mars. Through this close

examination of these European-Russian efforts, readers will appreciate an altogether new perspective on the history of space exploration, no longer defined by competition, but rather by collaboration and cooperation.

Re-Constructing Grassroots Holocaust Memory Irina Rebrova 2020-10-26 The main objective of the book is to allocate the grass roots initiatives of remembering the Holocaust victims in a particular region of Russia which has a very diverse ethnic structure and little presence of Jews at the same time. It aims to find out how such individual initiatives correspond to the official Russian hero-orientated concept of remembering the Second World war with almost no attention to the memory of war victims, including Holocaust victims. North Caucasus became the last address of thousands of Soviet Jews, both evacuees and locals. While there was almost no attention paid to the Holocaust victims in the official Soviet propaganda in the postwar period, local activists and historians together with the members of Jewish communities preserved Holocaust memory by installing small

Individual types of grass roots activities in the region on remembering Holocaust victims are analyzed in each chapter of the book.

*Civil Society in Putin's Russia* Elena A. Chebankova 2013 "Unlike other books on civil society in Russia which argue that Russia's civil society is relatively weak, and that democratisation in Russia went into reverse following Vladimir Putin's coming to power, this book contends that civil society in Russia is developing in a distinctive way. It shows that government and elite-led drives to encourage civil society have indeed been limited, and that the impact of external promotion of civil society has also

not been very successful. It demonstrates, however, that independent domestic grassroots movements are beginning to flourish, despite difficulties and adverse circumstances, and that this development fits well into the changing nature of contemporary Russian society."--Publisher's website.

### **Promoting Heritage Language in Northwest Russia**

Laura Siragusa 2017-10-19 This volume illustrates how language revival movements in Russia and elsewhere have often followed a specific pattern of literacy bias in the promotion of a minority's heritage language, partly neglecting the social and relational aspects of orality. Using the Vepsian Renaissance as an example, this volume brings to

the surface a literacy-orality dualism new to the discussion around revival movements. In addition to the more-theoretically oriented scopes, this book addresses all the actors involved in revival movements including activists, scholars and policy-makers, and opens a discussion on literacy and orality, and power and agency in the multiple relational aspects of written and oral practices. This study addresses issues common to language revival movements worldwide and will appeal to researchers of linguistic anthropology, sociolinguistics, education and language policy, and culture studies.

*Chinese Mythological Gods* Keith G. Stevens 2001

This is an introduction to the most frequently encountered Chinese deities in the enormous Chinese pantheon, focusing on those gods which express the most common concerns of the Chinese people. Some of these include the gods of creation myths, the mythical founders of China's early

societies, and the deities of the celestial world, nature, and destiny. There have been few written records of these popular myths and gods in English or Chinese, as they have traditionally been transmitted orally. Highlighting regional variations, this is the ideal companion to deciphering the divine maze of statues in most Chinese temples.

**Securitising Russia** Edwin Bacon 2013-07-19

Securitising Russia shows the impact of twenty-first-century security concerns on the way Russia is ruled. It demonstrates how President Putin has wrestled with terrorism, immigration, media freedom, religious pluralism, and economic globalism, and argues that fears of a return to old-style authoritarianism oversimplify the complex context of contemporary Russia. The book focuses on the internal security issues common to many states in the early twenty-first-century, and places them in the particular context of Russia. Detailed analysis of the place of security in Russia's political discourse and policy-making reveals nuances often missing from overarching assessments of Russia today. To characterise the Putin regime as the 'KGB-resurgent' is to miss vital continuities,

contexts, and on-going political conflicts which make up the contemporary Russian scene.

Securitising Russia draws together current debates about whether Russia is a 'normal' country developing its own democratic and market structures, or a nascent authoritarian regime returning to the past.

**The Social Life of Coffee** Brian Cowan 2008-10-01

What induced the British to adopt foreign coffee-drinking customs in the seventeenth century? Why did an entirely new social institution, the coffeehouse, emerge as the primary place for consumption of this new drink? In this lively book, Brian Cowan locates the answers to these questions in the particularly British combination of curiosity, commerce, and civil society. Cowan provides the definitive account of the origins of coffee drinking and coffeehouse society, and in so doing he reshapes our understanding of the commercial and consumer

revolutions in Britain during the long Stuart century. Britain's virtuosi, gentlemanly patrons of the arts and sciences, were profoundly interested in things strange and exotic. Cowan explores how such virtuosi spurred initial consumer interest in coffee and invented the social template for the first coffeehouses. As the coffeehouse evolved, rising to take a central role in British commercial and civil society, the virtuosi were also transformed by their own invention.
