**Extension and its Limits** Grzegorz Drożdż 2014-10-16 The present volume focuses on a special topic – on the one hand, found at all levels of language organization, and presumably present in language since its origin. On the other hand, this issue – extension – has only relatively recently become the subject of serious study and, as such, it is still a largely unexplored, fresh, and exciting object of linguistic pursuit. Equipped with multiple linguistic tools, the contributors investigate, among others, such facets of extension as its regularities, directions, possible limits, and methodologies that can best account for it. By doing so, they provide significant insights into the following research areas: the multidimensional nature of the lexical item; the influence that metaphorical and metonymic extension of lexical items has on these items' grammar; as well as the semantics and, in particular, the polysemy of constructions. Richly illustrated with examples from several languages, including English, French, Polish, Russian, and German, this volume enhances the understanding of the nature of extension.

**Reciprocal Constructions** Vladimir P. Nedjalkov 2007-11-06 This monograph constitutes the first comprehensive investigation of reciprocal constructions and related phenomena in the world's languages. Reciprocal constructions (of the type The two boys hit each other, The poets admire each other's poems) have often been the subject of language-particular studies, but it is only in this work that a truly global comparative picture emerges. Nine stage-setting chapters dealing with general and theoretical matters are followed by 40 chapters containing in-depth descriptions of reciprocals in individual languages by renowned specialists. The introductory papers provide a conceptual and terminological framework that allows the authors of the individual chapters to characterize their languages in comparable terms, making it easy for the reader to see points of commonality between languages and constructions that have never been compared before. This set of volumes is an indispensable starting point and will be a lasting reference work for any future studies of reciprocals.

**Mobility for Smart Cities and Regional Development - Challenges for Higher Education** Michael E. Auer 2022 This book presents recent research on interactive collaborative learning. We are currently witnessing a significant transformation in the development of education and especially post-secondary education. To face these challenges, higher education has to find innovative ways to quickly respond to these new needs. On the one hand, there is a pressure by the new situation in regard to the COVID pandemic. On the other hand, the methods and organizational forms of teaching and learning at higher educational institutions have changed rapidly in recent months. Scientifically based statements as well as excellent experiences (best practice) are absolutely necessary. These were the aims connected with the 24th International Conference on Interactive Collaborative Learning (ICL2021), which was held online by Technische Universität Dresden, Germany, on 22-24 September 2021. Since its beginning in 1998, this conference is devoted to new approaches in learning with a focus on collaborative learning in Higher Education. Nowadays, the ICL conferences are a forum of the exchange of relevant trends and research results as well as the presentation of practical experiences in Learning and Engineering Pedagogy. In this way, we try to bridge the gap between 'pure' scientific research and the everyday work of educators. This book contains papers in the fields of Teaching Best Practices Research in Engineering Pedagogy Engineering Pedagogy Education Entrepreneurship in Engineering Education Project-Based Learning Virtual and Augmented Learning Immersive Learning in Healthcare and Medical Education. Interested readership includes policymakers, academics, educators, researchers in pedagogy and learning theory, schoolteachers, learning industry, further and continuing education lecturers, etc.

2018-06-11 This book focuses on an increasingly attractive, yet controversial topic of non-native accentuatedness in speech. The contributors here are aware of the fact that the mechanisms and effects of pronunciation are far too complex to allow for strong and definite claims of any sort, but present research leading to useful answers to relevant questions. The book contributes to the deeper understanding of many aspects of foreign-accented English with reference to clearly described empirical evidence. The volume brings together fourteen chapters organized into four subdivisions, covering conceptual and perceptual issues, questions of segmental and suprasegmental pronunciation features, and methodological and

didactic recommendations. As such, it provides a cross-sectional view of the current phonetic and didactic empirical research into the pronunciation of non-native English.

**Young English Language Learners** Eugene E. Garcia 2019-07-05 It is well known that the number of non-English speakers is on the rise in the United States. What is less well known is that the largest proportion of this population is children under the age of 5. These young English language learners (ELLs) often demonstrate achievement gaps in basic math and reading skills when they start school. How best to educate this important and growing preschool population is a pressing concern for policymakers and practitioners. The chapters in this important book provide up-to-date syntheses of the research base for young ELLs on critical topics such as demographics, development of bilingualism, cognitive and neurological benefits of bilingualism, and family relationships, as well as classroom, assessment, and teacher-preparation practices. Contributors: Linda M. Espinosa, Margaret Freedson, Claudia Galindo, Fred Genesee, Donald J. Hernandez, José E. Nájuez Sr., and Flora V. Rodríguez-Brown "This is a must-have for those who are working directly or indirectly with young English language learners." –Olivia Saracho, University of Maryland, College Park, Maryland

**Community College Models** Rosalind Latiner Raby 2009-03-22 Increasingly, students worldwide are seeking post-secondary education to acquire new skill-sets and credentials. There is an explosion of community college models that provide educational opportunities and alternative pathways for students who do not fit the traditional higher educational profile. This book focuses on economic models to help local and national economies develop strong workforce training, humanitarian models to bring about social mobility and peace, transformative models to help institutions expand and keep up with societal needs, and newly created models that respond to the educational and training needs of a constantly changing world. These models seek to capture the imagination of those who are committed to learning about what works in higher education and in particular, the impact community college models are having on the changing nature of world social, political and economic landscapes. With contributors representing 30 countries, this book presents an international perspective.

**Clinical Sociolinguistics** Martin J. Ball 2005-08-19 Sociolinguistics, the study of the interaction of language and society, has had a major impact on linguistics for the last half-century. However, this prominent branch of the language sciences has had little contact with the field of communication disorders. "Clinical Sociolinguistics," a collection of newly commissioned articles written by top scholars, is a major advance in bringing the two fields together. Part I includes chapters that outline findings from sociolinguistic research and point to the relevance of such findings for practicing speech-language pathologists. Topics discussed include bilingualism, code-switching, language planning, and a detailed look at African American English. Part II contains chapters that specifically demonstrate how these research paradigms can be applied to assessment, diagnosis, and treatment in the clinical situation.

*Teaching and Researching the Pronunciation of English* Ewa Waniak-Klimczak 2014-10-17 The book contains contributions from practitioners and theoreticians who explore the pronunciation of English from various perspectives: phonetic, phonological, psycholinguistic and sociolinguistic. In accordance with the unifying theme of the volume, individual contributions investigate the characteristics of a foreign accent, its production and perception, study the development of methods and techniques in pronunciation teaching, evaluate their use in classroom materials and in the classroom itself, and investigate the conditions for second language learning and teaching from the perspective of learners and teachers. The book offers a unique combination of a scholarly research with practical applications, inspired over the years by the work of

Professor Włodzimierz Sobkowiak, who has researched pronunciation teaching and pioneered technology-oriented, corpus-based approaches to the study of English pronunciation in Poland.

**Pronunciation in EFL Instruction** Jolanta Szpyra 2014-11-01 In view of recent debates on the global spread of English and its international lingua franca role, what pronunciation models are appropriate for millions of EFL learners? Which aspects of English phonetics should be taught to foreign students and which can be neglected with little loss in communication? How can English pronunciation be taught in an interesting and effective way which is both learner- and teacher-friendly, in accordance with the latest scholarly and technological achievements? This research-based book addresses these and many other fundamental issues that are currently at the centre of pronunciation research. It offers a wealth of new theoretical ideas and practical solutions to various phonodidactic problems that arise in EFL contexts, approaching pronunciation instruction from global and local perspectives and supporting its theoretical claims with extensive empirical evidence. It will be of interest to EFL teachers and teacher trainers, pronunciation specialists and students of applied linguistics.
