**Algorithms** Robert Sedgewick  
2014-02-01 This book is Part II of  
the fourth edition of Robert  
Sedgewick and Kevin Wayne's  
Algorithms , the leading textbook on  
algorithms today, widely used in  
colleges and universities worldwide.  
Part II contains Chapters 4 through 6  
of the book. The fourth edition of  
Algorithms surveys the most important  
computer algorithms currently in use  
and provides a full treatment of data  
structures and algorithms for  
sorting, searching, graph processing,  
and string processing -- including  
fifty algorithms every programmer  
should know. In this edition, new  
Java implementations are written in  
an accessible modular programming  
style, where all of the code is  
exposed to the reader and ready to

use. The algorithms in this book  
represent a body of knowledge  
developed over the last 50 years that  
has become indispensable, not just  
for professional programmers and  
computer science students but for any  
student with interests in science,  
mathematics, and engineering, not to  
mention students who use computation  
in the liberal arts. The companion  
web site, [algs4.cs.princeton.edu](http://algs4.cs.princeton.edu)  
contains An online synopsis Full Java  
implementations Test data Exercises  
and answers Dynamic visualizations  
Lecture slides Programming  
assignments with checklists Links to  
related material The MOOC related to  
this book is accessible via the  
"Online Course" link at  
[algs4.cs.princeton.edu](http://algs4.cs.princeton.edu). The course  
offers more than 100 video lecture  
segments that are integrated with the  
text, extensive online assessments,  
and the large-scale discussion forums  
that have proven so valuable. Offered  
each fall and spring, this course  
regularly attracts tens of thousands  
of registrants. Robert Sedgewick and  
Kevin Wayne are developing a modern  
approach to disseminating knowledge  
that fully embraces technology,  
enabling people all around the world  
to discover new ways of learning and  
teaching. By integrating their  
textbook, online content, and MOOC,  
all at the state of the art, they  
have built a unique resource that  
greatly expands the breadth and depth  
of the educational experience.

Obrońcy mórz Stanisław Sadkiewicz

2020-03-30 Wojna domowa w Somalii obraca ten kraj w gruzy. Nikt nie pilnuje granic. Nie ma komu bronić zwykłych ludzi. Dla nich to piekło na ziemi. Dla reszty świata - eldorado. Na somalijskie wody terytorialnie bezkarnie wpływają statki międzynarodowych koncernów. Topią w morzu toksyczne odpady. Organizują nielegalne połowy. Somalijscy rybacy patrzą na to bezradnie. Głód, nędza i chęć zemsty pchają ich w morze. Tym razem jednak nie będą łowić ryb. Zamierzają polować na ludzi. Porywać ich statki dla okupu. W swoich małych łodziach, ze starymi kałasznikowami w rękach, rzucają wyzwanie światowym potęgom morskim. Choć samych siebie nazwą obrońcami mórz, świat usłyszy o nich jako o somalijskich piratach - wrogach całej ludzkości. Kim są, czego chcą i jak się im przeciwstawić? Kto jest tym złym? Czy na pewno oni? A może zachodni świat nie jest całkiem bez winy? O tym wszystkim opowiada w porywającym stylu Stanisław Sadkiewicz, polski oficer ochrony statków oceanicznych, były żołnierz zawodowy. Człowiek, którego piraci z Czarnego Łądu woleliby nie spotkać. Stanisław Sadkiewicz - były żołnierz zawodowy; obecnie specjalista od bezpieczeństwa i zarządzania ryzykiem. Sześć lat służył w 6. Brygadzie Desantowo-Szturmowej, w 2012 roku walczył w Afganistanie w ramach XI zmiany Polskiego Kontyngentu Wojskowego. Po odejściu z wojska pracował m.in. jako oficer ochrony na statkach przepływających przez regiony zagrożone piractwem na Oceanie Indyjskim.

**Capitalism and Modernity** Jack Goody 2013-05-02 This important new book investigates how the West attained its current position of economic and social advantage. In an incisive historical analysis, Jack Goody examines when and why Europe (and Anglo-America) started to outstrip all other continents in socio-economic growth. Drawing on non-Western examples of economic and technical progress, Goody challenges assumptions about long-term European supremacy of a 'cultural' kind, as was a feature of many theories current in social science. He argues that the divergence came with the Industrial Revolution and that the earlier bourgeois revolution of the sixteenth century was but one among many Eurasia-wide expressions of developing mercantile and manufacturing activity. This original book casts new light on the history of capitalism, industrialization and modernity, and will be essential reading for all those interested in the great debate about the economic rise of the West.

**That Which Is Seen, and That Which Is

Bastiat 2010-02 Claude Frederic  
Bastiat (1801-1850) was a French  
classical liberal theorist, political

economist, and member of the French  
assembly. He was born in Bayonne,  
Aquitaine, France. When he was nine  
years old, he was orphaned and became  
a ward of his father's parents. At  
age seventeen he left school to  
become more involved with his  
family's business as an exporter.

When he was twenty-five, his  
grandfather and benefactor died,  
leaving the young man the family  
estate and providing him with the  
means to further his own theoretical  
inquiries. His areas of intellectual  
interest were diverse, including

"philosophy, history, politics,  
religion, travel, poetry, political  
economy, and biography." His public  
career as an economist began only in  
1844, and was cut short by his  
untimely death in 1850. He was the  
author of many works on economics and  
political economy, generally

characterized by their clear  
organization, forceful argumentation,  
and acerbic wit. Among his better  
known works is Economic Sophisms.
