These books provide prompt access to the latest innovations in research and technology in their respective fields. Proceedings of SPIE are among the most cited references in patent literature.

E:Corbusier Le Corbusier 2012 Between 1947 and 1953, Le Corbusier (1887-1965) produced a series of lithographs and poems that can be

regarded as an artistic realization of his worldview. The works have been arranged in such a way that seven rows, one upon the other, result in a picture wall, an iconostasis. Each row is dedicated to a specific topic, ranging from the environment and mental and physical elements to the right angle, with which human beings establish their own order. The publication presents a meticulously reproduced facsimile of the original lithographs and the poème from 1955. An appendix includes a translation into English. Le Corbusier once stated that his buildings first became possible on the basis of his artistic work, thus the cycle also reveals the architectural achievements of the greatest architect of the 20th century.
